

Computer Networks

(Mạng Máy Tính)

Lectured by: Phuong-Duy Nguyen
pdnguyen@hcmut.edu.vn

Course Details

- Number of credits: 3
- 2 lecture hours for theory
- 2 lecture hours for exercises and lab work
- 5 hours for self-study

Course Outline (1)

- Fundamental concepts in design and implementation of computer networks
- Protocols, standards and applications
- Introduction to network programming

Course Outline (2)

- Network architecture, OSI and TCP/IP models
- DNS, E-mail and WWW
- Network-programming interface
- UDP and TCP
- Internet addressing and routing
- Ethernet, wireless networks and Bluetooth

References

- Computer Networking: A Top Down Approach (9th Ed.), Kurose & Ross, 2026
- Computer Networks (5th Ed.), Tanenbaum & Wetherall, 2011

Assessment

- Assignments: 30% (2 x 15%)
- Lab exercises: 10%
- Final exam: 60%
- Laboratory work is compulsory
- No lab work = No assignment mark
- Students may use AI tools to support their learning;
- However, students will receive a **score of 0** in any of the following cases:
 - Any use of AI to complete lab/assignments or course projects without being able to explain and justify the submitted solution.
 - -Any form of academic dishonesty, including copying from other students, sharing solutions, or having someone else complete the work.
